

## How to apply

Go to our website and click on “Apply Online”. The application process takes only three steps!

1. Fill out the Online Application Form
2. Upload your supporting documents (certificates and transcripts)
3. Pay the application fee (credit card or bank transfer)

## Documents needed for your application

A complete application consists of:

- Passport
- Secondary school certificates and transcripts (in original language and as legally attested translations to German or English)
- Up to three different university and study program choices; at least one needs to be a University of Applied Sciences

If you attended a university before or hold a (German and/or English) language certificate, please also hand in:

- University certificates and transcripts (in original language and as legally attested translations to German or English)
- Language certificate:
  - . For German programs: TestDaF, telc, DSH, or Goethe examination certificate
  - . For the English program: IELTS or TOEFL

## General requirements for applications / FAQs

- No admission exam
- Requirements Bachelor:
  - . Secondary school graduation certificate (usually 12 years)
  - . Minimum 50 % of the overall possible points
- Requirements Master:
  - . Bachelor degree in the desired area of study at an accredited university
  - . GPA that converts to at least 2,5 in the German grading scale
- German programs (Bachelor and Master):
  - . German language proficiency is usually not required\*
  - . If you already hold a German certificate this will shorten your program
- English program (Bachelor):
  - . TOEFL iBT 80 or IELTS 6.5

\*Note: Some countries require a B1 certificate when you apply for a visa. Please check with your local German embassy.

## Why studying in Germany is a good idea

- Germany is one of the few countries that does not demand tuition fees for university studies; only semester fee of 50 – 200 Euro per semester, for free public transport, free access to university sports, cheaper prices for meals at the university canteen, and many other savings
- Studying and living in Germany is cheaper and more affordable than other countries like the UK, or the Netherlands
- Germany is the country with the most private scholarship organizations
- Becoming a German engineer or IT specialist comes with a high reputation
- Innovative engineering and IT sectors
- Big brands: BASF, Siemens, VW, or BMW
- Germany is demanding engineers and IT specialists
- After your studies, you can search for a job in Germany for up to 18 months

Germany is a very welcoming, multi-cultural country, which offers you excellent education, bright working prospects, and a brilliant future.

## BIC Preparation Programs

International applicants (non-EU) need to do a preparation program before they can start their university studies in Germany. All courses include a six week intensive Math+ course incl. scientific work. All courses include a secured study place at one of our partner universities.
